Technical Skills

Languages: JavaScript, Java, C++, HTML, CSS

Frameworks & Libraries: React, Node.js, JavaFX

Backend & APIs: RESTful APIs, API integration

Databases: SQL, MySQL

Tools & Platforms: Git, VS Code, SharePoint, Smartsheet

Concepts: Object-Oriented Programming (OOP), Asynchronous Programming, Data Structures, API Design, Debugging & Troubleshooting, RESTful APIs

Projects

FlowForge – Workflow Builder Application (Java, JavaFX)

- Developed a Java-based desktop application using JavaFX to create and manage task-based workflows
- Implemented task dependency mapping, drag-and-drop functionality, and real-time UI updates using event-driven programming and object-oriented design
- Designed local data persistence using SQLite and JSON serialization to support reliable data storage and retrieval
- Built PDF export functionality using file I/O for workflow visualization and reporting
- Applied Model-View-Controller (MVC) architecture to create a modular, scalable, and maintainable codebase
- Utilized data structures and algorithmic logic to manage task dependencies and workflow execution order

InsightBoard – Workflow Analytics Dashboard (React, JavaScript)

- Developed a web application to visualize and analyze workflow and task data through an interactive dashboard
- Processed structured workflow data (JSON) to display task completion trends, status breakdowns, and workflow insights
- Implemented asynchronous data handling using async/await to support real-time data updates
- Transformed data into structured visual components for improved readability and decision-making
- Built a dynamic user interface using React with component-based architecture
- Managed application state to support interactive filtering and real-time updates

- Implemented error handling and loading states to ensure a reliable user experience
- Designed the dashboard to support real-world workflow analytics and improve data-driven decision-making

Experience

Corporate & IT Assistant — Westford Real Estate Management, Vernon, CT (Mar 2024 – Present)

- Managed and optimized user lifecycle workflows across multiple systems, improving data accuracy and operational efficiency
- Troubleshoot system and data issues, identifying root causes and implementing solutions
- Administered email infrastructure including aliases, rules, and access permissions
- Maintained SharePoint environments including structure, data migration, and permissions
- Built and maintained tracking systems to ensure data accuracy and audit readiness
- Improved operational efficiency by standardizing workflows and reducing errors

Assistant Teacher — Bright Horizons, Bloomfield, CT (Jun 2021 – Mar 2024)

- Managed structured schedules and tracked developmental data
- Increased program enrollment by 20% through process improvements and engagement
- Conducted evaluations and communicated progress with stakeholders

Sales Associate — Victoria's Secret, Manchester, CT (Sep 2019 – Jun 2021)

- Met sales targets and supported rollout of rewards program increasing traffic

Sales Associate — JCPenney, Manchester, CT (Nov 2018 – Sep 2019)

- Assisted customers and supported store operations and merchandising

Education

- Bachelor of Science in Computer Science - Johnson & Wales University, Providence, RI

Graduated: 2025
